

Sistem de control al traficului aerian

Proiect realizat de: Std. cap. DICU ANDREI-STEFAN
Grupa: C-112D

CUPRINS:

1.Introducere

2.Crearea bazei de date

3.Crearea tabelelor

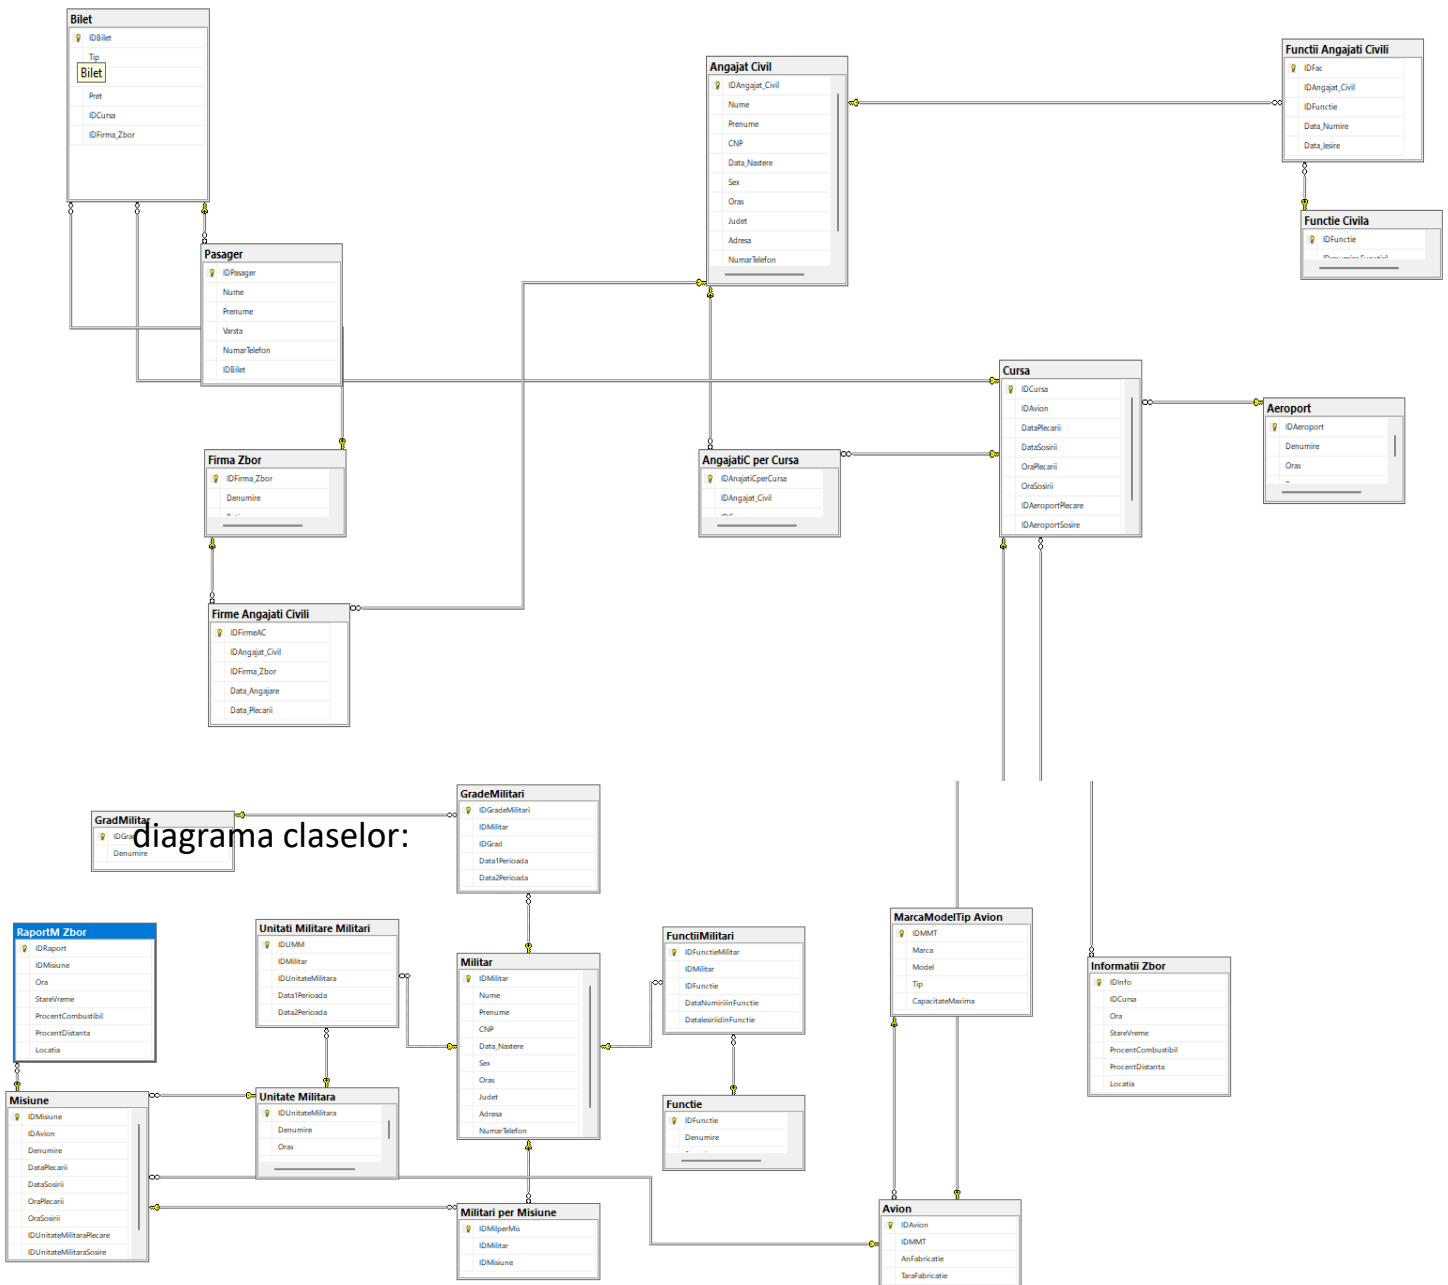

4.Popularea tabelelor

5.Cerinte

1.INTRODUCERE

Proiectul vizeaza gestionarea bazei de date al unui sistem de control al traficului aerian, , luand in considerare aspectele semnificative ce tin de desfasurarea completa a activitatii in cadrul unei astfel de intreprinderi.

Pentru a ne forma o idee de inceput asupra bazei de date, observam

Am separat structura principala a bazei de date in doua parti importante si bine diferite in viata cotidiana referitor la controlul aerian , Militar si Civil, astfel sistemul de gestiune recunoaste diferentele dintre cele doua si aduce informatii necesare in ambele cazuri pentru a putea observa inregistrările cat mai in detaliu.

Informatiile consta in special in observarea zborurilor(Curse) , detalii despre tot personalul civil al firmelor aeriene ,despre militarii ce se deplaseaza in misiuni, cat si despre pasagerii din cadrul civil si avioanele in care se deplaseaza catre o anumita locatie.In plus am adaugat tabele care la anumite momente inregistreaza rapoarte si informatii de zbor legate despre vremea exterioara, conditii de zbor , locatia curenta , data si ora, combustibilul si procentul distantei realizate pana in momentul respectiv.

2.CREAREA BAZEI DE DATE

```
CREATE DATABASE SistemControlTraficAerian2
ON PRIMARY
(
    Name = Data_1,
    FileName = 'C:\Users\andre\OneDrive\Desktop\BazedeDate\Proiect1.2\Data_1.mdf',
    size = 10MB, -- KB, Mb, GB, TB
    maxsize = unlimited,
    filegrowth = 1GB
),
(
    Name = Data_2,
    FileName = 'C:\Users\andre\OneDrive\Desktop\BazedeDate\Proiect1.2\Data_2.ndf',
    size = 10MB, -- KB, Mb, GB, TB
    maxsize = unlimited,
    filegrowth = 1GB
),
(
    Name = Data_3,
    FileName = 'C:\Users\andre\OneDrive\Desktop\BazedeDate\Proiect1.2\Data_3.ndf',
    size = 10MB, -- KB, Mb, GB, TB
    maxsize = unlimited,
    filegrowth = 1GB
)
LOG ON
(
    Name = Log_1,
    FileName = 'C:\Users\andre\OneDrive\Desktop\BazedeDate\Proiect1.2\Log_1.ldf',
    size = 10MB, -- KB, Mb, GB, TB
    maxsize = unlimited,
    filegrowth = 1024MB
)
```

```

),
(
    Name = Log_2,
    FileName = 'C:\Users\andre\OneDrive\Desktop\BazedeDate\Proiect1.2\Log_2.ldf',
    size = 10MB, -- KB, Mb, GB, TB
    maxsize = unlimited,
    filegrowth = 1024MB
)

```

3.CREAREA TABELELOR

```
